CARRIER GOAL

To establish a successful career in Software Engineering, focusing on designing, developing, and delivering innovative software solutions. I aim to utilize my technical expertise, problem-solving skills, and passion for technology to contribute to cutting-edge projects, ensure high-quality software products, and continuously grow as a professional in the field.

TECHNICAL SKILLS

Programming Languages	C, C++, Java, Python, Kotlin, PHP, Dart, JavaScript, Typescript
Web Development	HTML, CSS, React, Nodejs, Tailwind CSS, Bootstrap.
App Development	Java, Flutter, Android (Native) - Kotlin, React REstFull API intregation, Dynamic UI
Database Management	MySQL, SQLite, NoSQL, MongoDB, Firebase, PostgreSQL
Design & Graphics	Figma, Inkscape, Canva, GIMP, draw.io
Tools	• Git & GitHub • Eclipse, VS code, Android Studio, Collab, Visual Studio, Code::Blocks, Arduino.
Office & Productivity Tools	MS Word, MS Excel, PowerPoint, LibreOffice Suite.
Specialized Skills	App Development & Design, Web Development & Design, Data Analysis.
Soft Skills	Team Collaboration, Independent Working, Initiative Taking.
Operating System	Linux(Debian Mint based), Windows

LANGUAGE SKILLS

English Language	Intermediate proficiency
Bangla Language	Advanced proficiency

PROJECTS

Mobile Healthcare Assistant

Mar 2023 – Oct 2023

Health-Care – Developed a healthcare app using Java for Android to manage patient vitals, appointment scheduling, and medication reminders. Android Native (Java) , UI (XML).

- Key Output: Enabled users to record health data locally (SQLite) and receive real-time medication alerts.

Digital Wellness Companion

Jan 2023 – Aug 2023

MindMate – Created a mental wellness app with Java for Android offering mood tracking, journaling, and AI-driven self-care suggestions. Android Native (Java) , UI (XML).

- Key Output: Improved user engagement with daily wellness check-ins and trend analytics.

Interactive Learning Platform

Jul 2023 – Dec 2023

QuizApp – Designed an interactive quiz app using Java for Android with multiple categories, timed quizzes, and scoreboards. Android Native (Java) , UI (XML).

- Key Output: Delivered an offline-capable quiz experience with instant results and performance history.

Community Support Connector

Jan 2024 – May 2024

Care_Point – Built an app using Java for Android to connect volunteers with individuals in need, supporting request posting and task tracking. Android Native (Java) , UI (XML).

- Key Output: Facilitated faster volunteer responses with real-time updates via Firebase.

Food Sharing Network

May 2023 – Nov 2023

Food_Share – Developed a platform using Java for Android for posting, sharing, and claiming meals. Android Native (Java) , UI (XML).

- Key Output: Integrated Google Maps for pickup locations and streamlined donation matching.

Smart E-Commerce Solution

Feb 2025 – Sep 2025

NetBagZ – Created an e-commerce app in Java for Android for selling net bags with product management and cart features. Android Native (Java) , UI (XML).

- Key Output: Allowed dynamic product updates, image uploads, and secure order processing via MySQL/PHP backend.

On-Demand Home Service Platform

Apr 2024 – Aug 2024

Dorkar (Flutter) – Developed a cross-platform mobile application using Flutter for booking home services such as cleaning, plumbing, and electrical repairs. Integrated real-time booking, service tracking, and secure payment gateways.

- Key Output: Delivered a seamless multi-device experience with faster booking processes and improved customer-service provider connectivity.

Personal Note Management App

May 2025 – Present

- **CV_Maker** (Flutter) – Working on a mobile CV creation tool with professional templates and PDF export functionality.

Interactive Arcade Game

Jun 2025 – Present

- **2D Snake Game** (Flutter) – Building a classic Snake game with custom levels, increasing difficulty, and touch controls.

Developer Community Platform

July 2025 – Present

- **StackOverflow** App (Flutter) – Creating a mobile-friendly version of StackOverflow with Q&A browsing, search, and bookmarking.
-

Intelligent Voice-Controlled Robotics System

Jan 2024 – Oct 2024

Voice-Controlled Robot (IoT) – Designed and developed an IoT-based robot using voice commands for navigation and control. Implemented functionality to move forward, backward, turn, and control lights via voice recognition.

- Key Output: Enabled seamless wireless control using IoT modules and voice commands, improving automation and human-machine interaction efficiency.
-

Automated Utility Billing System

Aug 2023 – Dec 2023

Water-Billing Application (C#) – Developed a desktop application using C# for automated water usage billing. Included customer management, meter reading entry, bill calculation, and report generation.

- Key Output: Reduced manual workload by automating bill calculation and record-keeping, ensuring faster and more accurate billing.
-

Online Student Project Showcase

Aug 2025 - Present

Student-Projects-Platform (JavaScript) – Developed a web-based platform using JavaScript for students to upload, share, and showcase their academic projects. Included features like project search, category filters, and user profiles.

- Key Output: Provided a collaborative space for students to display work, increasing visibility and peer learning opportunities.
-

Personal Portfolio Website

Jan 2024 – Apr 2024

Maharab_Portfolio (TypeScript) – Built a responsive portfolio website using TypeScript to showcase personal projects, skills, and achievements. Implemented smooth navigation, interactive UI components, and mobile-friendly design.

- Key Output: Created a professional online presence, improving accessibility for recruiters and collaborators to view work and contact easily.
-

deshiShop Website

Aug 2025 – Present

deshiShop (React) – This project is a full-stack e-commerce web app called "deshiShop" built with React (frontend) and Node.js/Express/MongoDB (backend). It supports user authentication, product browsing, cart, wishlist, orders, and admin features.

- Key Output: A complete MERN (MongoDB, Express, React, Node.js) e-commerce project with user authentication, product management, cart, wishlist, order processing, and admin dashboard features.
-

Lung Cancer Prediction

May 2025 - Jun 2025

- Developed an ML model using Python and Google Colab to detect lung cancer early, improving diagnostic accuracy. Machine Learning : SVM

Heart Disease Prediction

May 2025 - Jun 2025

- Created a heart disease risk forecasting model with Python and Colab to support preventive healthcare. Machine Learning : SVM

EDUCATIONAL INFORMATION

Bachelor of Science in Computer Science and Engineering Bangladesh University of Business and Technology or BUBT Current Status: Running / Current CGPA 2.46 Plot # 77-78, Road # 9, Rupnagar R/A Mirpur-2 Dhaka, Dhaka 1216	2021 - 2026
Higher Secondary School Certificate Bangla Bazar Fatema Khanam College – 1419 Current Status: Passed South Digholdi, Bhola Sadar, Bhola – 8300	2019 - 2020
SECONDARY EDUCATION CERTIFICATE Bhola Residential Cadet School And College Current Status: Passed 390/1, Circuit House Road, 4 No Ward, Bhola Sadar, Bhola - 8300.	2017 - 2018

PERSONAL INFORMATION

Permanent Address:	Motahar Mastar Bari, Word No-07, Ratanpur, Shibpur, Bhola Sadar-8300, Barishal Division.
Present Address:	Rupnagar Abashik, Road No-08, Mirpur-02, Dhaka-1216, Dhaka Division.
Contact Number:	+880 15 8628 2609
Contact Email:	maharab442@gmail.com
Nationality:	Bangladesh
Date of Birth:	Nomvebor 02, 2003
Gender:	Male

CERTIFICATIONS

Python Programming: The Complete Course for Success	Udemy.
Fullstack MERN Web-Development	Udemy.
Complete Guide To Flutter Development	Udemy.
AWS Cloud Technical Essentials – Amazon Web Services	Link
Artificial Intelligence & Machine Learning Fundamentals	Link
Spring Boot API Development with Java	Link
Ambassador, International Congress on Recent Trends in Computer Science – 2024	Link
BUBT Intra-University Programming Contest – 2022	Link

INTERESTS

- **Mobile & Web Development** – Cross-platform apps with modern UI/UX.
 - **Artificial Intelligence & Machine Learning** – Building intelligent applications and models.
 - **Cloud Computing** – AWS services, API integration, and scalable deployments.
 - **IoT & Robotics** – Automation, smart devices, and voice-controlled systems.
 - **Design & Creativity** – UI/UX design, digital art, and creative problem-solving.
 - **Gaming** – Exploring game design and interactive experiences.
 - **Art** – Drawing, digital illustration, and creative visuals.
 - **Cricket & Sports** – Playing cricket and following tournaments.
 - **Competitive Programming** – Problem-solving in contests and hackathons.
