SUMMARY

Aspiring Software Engineer with strong hands-on experience in developing mobile and web applications using modern technologies. Skilled in full-stack development, problem-solving, and building user-focused solutions. Passionate about learning new technologies and delivering high-quality software through real-world projects

SKILLS

Programming Languages: Java, Dart, JavaScript, TypeScript, Python, C++, PHP.

Mobile Development: Flutter, Android (Java/Kotlin).

Frontend Development: React, HTML, CSS, Tailwind CSS.

Backend Development: Node.js, Express.js, Laravel, REST APIs.

Databases: MongoDB, MySQL, PostgreSQL, Firebase, SQLite.

Tools & Technologies: Git, GitHub, VS Code, Android Studio, Docker.

PROJECT

PurchifyShop – E-commerce Website

Developed a modern e-commerce website with product browsing, user-friendly interface, and responsive design for seamless shopping experience.

Key Output: Delivered a live production-ready platform with smooth navigation and improved user engagement.

Amin WebTech – Business Website

Designed and developed a professional business website with clean UI, service showcasing, and optimized performance for client engagement.

Key Output: Created a visually appealing and responsive website that enhances brand presence and user trust.

JourneyHub – Travel & Exploration Platform

Built a travel-focused platform for exploring destinations with structured UI and interactive features.

Key Output: Provided an engaging platform for users to discover and manage travel-related content effectively.

AI Agent Builder – Drag & Drop AI Tool

Built an interactive AI agent builder with drag-and-drop functionality, optimized performance, and improved UI/UX experience.

Key Output: Enhanced user interaction by simplifying complex AI workflow creation into an intuitive interface.

Dorkar – Home Service Mobile App (Flutter)

Designed and developed a cross-platform mobile application for booking home services, including real-time service tracking and smooth user interaction. Focused on performance and clean UI/UX design.

Key Output: Delivered a seamless service booking experience with improved user accessibility and efficiency.

Health-Care – Mobile Healthcare Application

Created an Android-based healthcare application for managing patient data, appointment scheduling, and medication reminders using SQLite for local storage.

Key Output: Enabled users to track health records and receive timely reminders, improving usability and data management.

Voice-Controlled Robot – IoT Project

Designed and implemented a voice-controlled robotic system capable of performing movement and automation tasks using IoT modules.

Key Output: Achieved efficient human-machine interaction through voice command-based control.

Lung Cancer Prediction

Developed an ML model using Python and Google Colab to detect lung cancer early, improving diagnostic accuracy. Machine Learning : SVM

EDUCATION

Bangladesh University of Business and Technology (BUBT) 2021-2026

Plot # 77-78, Road # 9, Rupnagar R/A Mirpur-2 Dhaka, Dhaka 1216

BSc in Computer Science and Engineering (CSE) | CGPA 2.56 (Current)

Bangla Bazar Fatema Khanam College – 1419 2019-2020

South Digholdi, Bhola Sadar, Bhola – 8300

Higher Secondary School Certificate | GPA 4.17

CERTIFICATIONS

Python Programming: The Complete Course for Success

Fullstack MERN Web-Development

AWS Cloud Technical Essentials – Amazon Web Services

Artificial Intelligence & Machine Learning Fundamentals

Spring Boot API Development with Java

Complete Guide To Flutter Development
